The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. James E. 5.0 out of 5 stars If I wanted to play my ipod in the bedroom I had to go around the bed and turn it on manually. If you want to repeat a track you also have to go to the ipod. With this kit you can use your remote to do all of that including skipping a track or pausing. For my money it is a good buy. However, the description says it will respond to your Bose Wave remote, and even shows a picture that does match the remote. However, unless I'm missing something, it does not advance the song choice, as stated. It will pause and play, but I cannot get it to forward or go back. It's working wonderful and since we have the Bose speakers and Bose radio and CD player it goes well with them and I keep my iPod in it all the time. Thanks so much Package says it was meant to come with a remote control. But there was nothing in the box Sorry, we failed to record your vote. Please try again. Please try again. Please try again.

You can see track and artist information on the systems display screen. The dock is powered by Bose link, eliminating the need for a separate power pack and wall plug. And, the Bose link connection means

the auxiliary input is freed for other audio sources. See full review Is It Worth it. Onsite Associates Program Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. CBB 1.0 out of 5 stars A waste of money. I tried with two different adapters as they recommended and still nothing but did get a quick refund. I have an iPhone 5. Very DISSAPOINTED. Spent over an hour trying to set it up my Bose Wave and all I get is static. Total ripoff. The dock does charge and allow the iPhone5 to play but not through the Music system. Sorry, we failed to record your vote. Please try again. Lastmanuals provides you a fast and easy access to the user manual BOSE WAVE CONNECT KIT FOR IPOD. We hope that this BOSE WAVE CONNECT KIT FOR IPOD user guide will be useful to you. Opening or removing covers may expose you to dangerous voltages or other hazards. We recommend that you place the dock to the right of your Bose Wave music system so the iPod has minimal effect on FM or AM reception. Be sure the IR sensor on the front of the iPod dock is visible and aligned with the Wave system IR sensor so both products respond to the remote. Use the supplied audio cable that is appropriate for your Bose system. Use the AUX button on the original remote instead of the iPod button on the new remote.

Please try again Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Happy camper here! I recommended to all who wish to have easy access to their music. Sorry, we failed to record your vote. Please try again My iPod Touch 4th generation a very common Sony iPod would not work on this dock. What a waste of money. Sorry, we failed to record your vote. Please try again The company

said it fits most iPhones, yet when it arrived the adapter plug OBVIOUSLY did not fit iPhone 5. The company should have said that does not fit iPhone 5, and saved me time, money and an unnecessary trip to the post office. Instead they tie up the your money in cost while you have to insure and send back, at your own expense, an item that would not have been purchased in the first place had they been honest at worse, or clear enough at best, to say the item did not fit iPhone 5, which they obviously knew. I deal with Amazon, in part, because of the convenience. Bose needs to better describe their products, especially accessories! Sorry, we failed to record your vote. Please try again. Reload to refresh your session.

Reload to refresh your session. The device is much easier to carry than a single compact disc. The downside to today's tiny personal music devices is that they can make it difficult to play music in a group setting or without earbuds. Connecting your iPod to a stereo system like the Bose Wave radio will fill a room with your favorite iPod tunes. Connect using Auxiliary Cable Step 1 Plug one end of the 3.5mm Aux cable into your iPod. Step 2 Plug the second end of the 3.5mm Aux cable into the Aux port on your Bose Wave radio. Step 3 Turn on both devices. Select a song on your iPod and play it. The music will play through the Bose speakers. Connect Using iPod Dock Step 1 Plug your iPod into the electrical cable into a wall outlet. You can now control your iPod using the Bose Wave radio remote control. Step 3 Turn on both devices. Step 4 Press the iPod button on the remote to select the device. Tips Although both options work well, the iPod dock is useful as it charges your device while it plays. He has years of experience with networking and hardware troubleshooting to help guide readers through their information technology related issues. Kingsley received his associates degree in computer networking systems from ITT Technical Institute in Woburn, Massachusetts. I figure I would try the community first before I try calling Bose. Anyone having similar problems Thanks, Paul If you did all the manual tells you to do and you still can't get things to work I would contact BOSE and see if your iPod 4 is compatible with the Wave III dock. Should have stated you can also try resetting your iPod or turn it off for a couple of minutes then turn it back on, may be a glitch, if it is this should clear it. Good luck. Cheers.
