Canon brand peripheral equipment and software which may be distributed with, or factory loaded on, the Equipment, are sold AS IS without warranty of any kind by Canon USA, including any implied warranty regarding merchantability or fitness for a particular purpose. The sole warranty with respect to such nonCanon brand items is given by the manufacturer or producer thereof. If the Equipment contains a hard disk drive, Canon USA recommends that data stored on that drive be duplicated or backed up to prevent its loss in the event of failure or other malfunction of such drive. Canon USA shall have no responsibility under this limited warranty for use of the Equipment in conjunction with incompatible peripheral equipment and incompatible software. In order to obtain warranty service, contact the authorized Canon retail dealer from whom you purchased the Equipment or call the CANON INFORMATION CENTER AT 1800OKCANON. You will be directed to the nearest service facility for your Equipment. This Limited Warranty covers all defects encountered in normal use of the Equipment and does not apply in the following cases This warranty does not cover units sold to rental firms, military operations, hotels, schools, hospitals or for other commercial, industrial, or institutional applications. These uses are covered only by such specific warranty as Canon may issue with such sales. This Limited Warranty does not apply to accessories or consumables for the Equipment, which are sold "AS IS", without warranty of any kind by Canon USA. Please retain this warranty card and your Bill of Sale as a permanent record of your purchase. This card is most important in order to be sure you are contacted right away should there be a safety

inspection, modification or product recall under applicable laws or regulations. Scroll down to easily select items to add to your shopping cart for a faster, easier checkout. <http://epowerofsales.com/images/bower-and-wilkins-panorama-2-manual.xml>

Visit the Canon Online Store This allows for uninterrupted recording of your special events and keeps your batteries ready to go. Since the mic is powered by the camcorders power source, you remain cable free. Wind shields are included. The cable connects to your camera and to the USB port on your PC or MAC Computer. Comes standard with the EOS 1Ds Mark III, 1D Mark IV, 1D Mark III, 1Ds Mark II, 1D Mark II N, 1D Mark II, 5D Mark II, 7D, 5D, 50D, 40D, 30D, 20D, 10D, Digital Rebel XTi, Digital Rebel XT and Digital Rebel. Elura camcorders feature Canons DV Photo Plus. DV Photo Plus unleashes the full digital imaging power of your Canon Megapixel camcorder, promising a superior level of clarity, color and excellence for video and photos. Canons DV Photo Plus DV Photo Plus unleashes the full digital imaging power of your Canon Megapixel camcorder, promising a superior level of clarity, color and excellence for video and photos. Spoil yourself with brilliant color and clarity The new line of Elura camcorders combines refined design sensibilities with the best in Canon technology. Featuring a 1.33 Megapixel Image Sensor, the camcorders deliver images with brilliant color and clarity. Shoot video and photos without interruption No more struggling to switch your camcorder between video and phototaking modes. With the new line of Elura camcorders, you can capture email ready 640 x 480 photos to the memory card while simultaneously recording highquality video to the tape. You wont miss a minute of the memories you want to capture. Zoom in on superior images With an Elura camcorder in your hand, you have imagemaking power designed by a company renowned for highquality professional optics. The Genuine Canon Optics found in every Elura camcorder is the result of Canons vast expertise in designing and crafting precision lenses for 35mm and broadcast TV cameras. The Elura 70 offers 18x optical zoom lens, and 360x digital zoom, taking full advantage of the DV format. Catch all the action without the shake Thanks to the Eluras high quality Image Stabilization system, your videos will always look smooth, steady and natural.You can rotate the screen for highor lowangle shots, or turn it around 180 to record yourself. When youre done shooting, the screen is perfect for reviewing your scenes. You can also transfer a photo directly to your computer, with just a single press of the button.

Shoot closeups theyll love When shooting closeups of people, the Eluraseries camcorders utilize a Skin Detail Function to automatically soften details. The result is a more complimentary appearance that will keep your subjects coming back. And for those moments when your subject is not in the centre of the frame, the Elura camcorders offer three focusing points that will automatically put your desired subject into sharp focus. Relive those lowlight moments Thanks to the Eluras Night Mode feature, you can easily capture lowlight images with the press of a button. Night Mode automatically selects a slow shutter speed and increases the sensitivity of the CCD to brighten up the image, while still preserving color. With Night Mode, what you record is closer to what your eye sees. Seamlessly connect to your computer, TV or VCR Embracing the industrys latest and most sophisticated technology, Canons Elura camcorders feature an exclusive connection circuit called VIC. VIC is a virtual powerhouse. Traditionally, multiple chips were needed to perform the camcorders input and output functions. However VIC manages it all with one single chip. The result is seamless connectivity whether you are connecting to a computer, TV, or VCR. Enjoy widescreen images With the Elura 70, you can record highresolution video in 169 format for playback on widescreen TVs. Unlike systems that record a vertically stretched picture, the Elura 70 uses the full width of the CCD, resulting in a widescreen picture that has higher quality and shows more of the action happening at either end of the screen. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how

recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Nicholas Suridis 1.0 out of 5 stars Well it records.

Well it records, but its fuzzy with lines across the screen and doesnt dump tape. Worthless!We are very satisfied and are enjoying making pictures with the camera.Made about 5 tapes during that time. The other day I decided to transfer them to my Mac for some editing, but the camera wouldnt accept a tape. Ruined several of the few tapes I made. I checked the Elura forums to see if others had experienced something similar. To my amazement, I found lots of folks with the exact same issue. One thread had 40,000 hits. Its obvious there is a design flaw here. I contacted Canon even spoke with a supervisor. He said there was no known issue like this. When I mentioned the tons of cases on the forums he said they were made up. So, buy a Canon if you must, but I would suggest an extended warranty if you do.I purchased it with an extended warranty just in case. For the price, the camcorder is a great buy. I wanted the MiniDV style since were going on a week long vacation and wanted to be sure we could simply pop in a new tape and keep taping without the need to upload data to a computer first. I also wanted the ability to use the camcorder to pass through the analog signals from our older vhs tapes. Weve had the camcorder for a few weeks and so far, everything seems as good or better than expected. Light and dark image quality is very good, asis the builtin microphone this camcorder also has an external microphone jack. Image quality when passing the analog signal through is acceptable, with the only breakdown coming when the vhs image is transitioning from dark to light. The only problem I had was I received a component kit for the wrong camcorder, so half the parts were missing and I had the instruction manual from a completely different model line again, factory refurbished and factory sealed so definitely a Canon issue. ElectronicsClub, my Amazon retailer, quickly took care of the issue.

Im afraid to use the camcorder for any video because it will give me an error message like the other one did.Amazing shots, nice 18x optical zoom, and great image stabilization. But after recording about eight tapes, the camera started to reject tapes when insterted. Now the camera is unusable. Each time I put in a brand new tape the camera will start up, spin some wheels, and then stop the wheels, and eject the tape. I have tried an offtheshelf miniDV head cleaner, but that didnt work. Please, beware of this camera.Before it broke on me, it was an excellent camcorder, especially for the pointandshoot crowd. It had manual options that were very handy. Then, of course, it broke. The tapes started jamming, the DV timecode was severely messed up, it gave odd error messages, and would turn off abruptly. I had maintained it very well, cleaning the heads regularly. The worst part, however, was dealing with Canon Customer Support. If you have never dealt with them before,.I have found that this problem is common with all of Canons lowerend camcorder series, including the ZR line and the Elura line. I have not ever had experience with the upperend cameras like the GL1 or XL1, but through research online they seem to be better engineered. That said, I still will not buy Canon again because their support is so bad. In these safety instructions the word 10. Power Sources — The CAPS700E. Page 5 Reference Guide Reference Guide.
