Recording reminder The camcorder counts from 1 to 10 seconds when you start recording. This is helpful to avoid scenes that are too short. Press and release the The camcorder rewinds the tape, plays back the last few seconds, and returns to record pause mode. Record Search. Move it toward T to zoom in telephoto. Press the zoom lever slightly for a slow zoom. Press harder for a faster zoom. With digital zoom, image resolution becomes lower the more you zoom PLAY VCR CAMERA MENU CAMERA SETUP 1. Press the MENU button to open the menu. If necessary, support the camcorder with your left hand. Be careful that your fingers do not touch the microphone or lens. Set the POWER switch to PLAY VCR. The picture may become distorted during some special playback modes. The camcorder stops the tape automatically after 5 minutes in playback pause mode to protect tape and video heads. The speaker does not sound when you close the LCD panel. Speaker CAMERA PLAY VCR Turn the SET dial up to increase the volume, and down to lower the volume. Connect the white plug to the white audio terminal L left, the red plug to the red audio terminal R right and the yellow plug to the yellow video terminal VIDEO. Selecting Menus and Settings 1. Press the MENU button to open the menu. 2. Turn the SET dial to select a submenu and press the SET dial. CAMERA MENU PLAY VCR CAMERA Submenu Menu Item D.EFFECT SETUP D.E.SELECT FADER TYPE EFFECT TYPE M.S.SPEED M.S.SPLIT CAMERA SETUP SHUTTER A.SL SHUTTER D.ZOOM IMG STAB WHITE BAL.ON, OFF OFF, PATTERN1, PATTERN2 Setting Options. Program AE Modes Auto The camcorder adjusts focus, exposure and other settings automatically. However, you have the option of adjusting the settings manually. Low Light mode Moving subjects may leave a trailing afterimage. Picture quality may not be as good as in other modes. The camcorder may have

difficulty to focus automatically. Moving subjects may leave a trailing afterimage. Picture quality may not be as good as in other modes. <http://comitatoamiantovelodromo.org/userfiles/instruction-manual-fulton-thermal-fluid-heater.s.xml>

The camcorder retains the setting even if you turn it off or change the program AE mode. AE SHIFT button. The setting resets to autofocus when you switch the program selector to EASY. Readjust the focus when you have turned off the camcorder. Fast Moving Subjects vertical lines. Keep the camcorder zoomed at the white object until step 3 is completed. The camcorder retains the custom white balance setting even if you turn it off. When you have set the custom white balance Depending on the light source, “. The image may flicker when recording with high shutter speeds. This allows you to record brightly in places with insufficient lighting. However, you can set the camcorder not to use a slow shutter speed. The camcorder starts recording after a 10second countdown. The count down appears on the screen. Wind Screen The camcorder reduces wind noise automatically. However, you can turn off the wind screen when recording indoors, or when you want the microphone to be as sensitive as possible. Fade Trigger FADET Corner Wipe CORNER Flip FLIP Zigzag ZIGZAG Tide TIDE Wipe WIPE Jump JUMP Puzzle PUZZLE Beam BEAM Art ART Mosaic MOSAIC Wave WAVE MultiImage Screen Captures moving subjects in 4, 9 or 16 sequences of still images and displays them at one time. The name of the selected fader flashes. Turn off the digital effect when you do not use it. The camcorder retains the setting even if you turn it off or change the program AE mode. The image quality may be slightly lower with digital effects. If you connect the camcorder to a TV with Video ID1 system, recordings made in the widescreen mode will be automatically played back in widescreen mode. When you play back a tape, you can display the data code and select the data code combination you wish to display. The data code will not display the next time you turn on the camcorder. SixSecond Auto Date Date and time appear for 6 seconds when you begin playback, or to indicate that date or time zone has changed.

However, the mix balance is memorized by the camcorder. Changing the My Camera Settings CAMERA PLAY VCR MENU MY CAMERA 1. The displays “ button names on the camcorder and will not change when you change the language. Changing the Date Format You can select between three date formats. If you turn off the beep, all camcorder sounds including the ones of the My Camera settings will be turned off. It starts automatically when you leave the camcorder turned on without loading a recording media for more than 5 minutes. However, you can set the camcorder not to start the demonstration mode. If you connect a digital video device, you can copy recordings with virtually no generation loss in image and sound quality. CAMERA PLAY VCR 1. Connect the camcorder to the analog video device. Blank sections may be recorded as anomalous picture. If the picture does not appear, reconnect the DV cable or turn the camcorder off and back on again. You can only record signals from devices with the system in SP or LP format note that signals from identically shaped terminals may be of different format. If you attempt to play back such tape, “COPYRIGHT PROTECTED PLAYBACK IS RESTRICTED” appears and you will not be able to view the contents of the tape. If you attempt to record from such tape via the DV terminal, “COPYRIGHT PROTECTED DUBBING RESTRICTED”. The DV terminal serves as output terminal only. We recommend powering the camcorder from a household power source. If the problem persists, disconnect the interface cable, turn off camcorder and computer, turn camcorder and computer back on and reconnect them. We recommend powering the camcorder from a household power source while it is connected to the computer. For playback, you can show the camcorder displays on the TV screen. Replace the cassette or change the ERASURE PREVENTION position of the protect switch. REMOVE THE Camcorder stopped operating to protect the tape. Unload and CASSETTE reload the cassette.

CHECK THE INPUT DV cable is not connected, or the connected digital device is turned off. Tapes already recorded with dirty video heads may not be played back correctly even when you clean the

video heads. Contact to metallic objects may cause a short circuit and damage the battery pack. Dirty terminals may cause a poor contact between the battery pack and the camcorder. Wipe the terminals with a soft cloth. If the tape becomes slack and damaged, it may cause picture and sound distortion. Return cassettes in the case and store them upright. Do not leave the cassette in the camcorder after use. Do not use spliced tapes or nonstandard cassettes as they may damage the camcorder. Consult the Canon Service Center for information on plug adapters for overseas use. Playback on a TV Screen You can only play back your recordings on TVs with NTSC system. Consult your dealer or a Canon Service Center if the problem persists. Power Source Problem Camcorder will not turn on. The camcorder switches off by itself. Cassette compartment will not open. Cause Camcorder is turned off, or is Set the camcorder to PLAY not set to PLAY VCR mode. VCR mode. Cassette is not loaded. Load a cassette. Tape reached the end Rewind the tape. Canons most affordable, yet exceptionally powerful, digital camcorder brings together a variety of advanced features in one stylish package. Inside the streamlined body of the ZR100 is Canons DIGIC DV system, which delivers outstanding image quality for both videos and photos. Another highlight of the ZR100 is its highresolution 169 widescreen recording mode, which lets you capture true widescreen photos and videos. With the ZR100 in hand, all of lifes most precious moments are yours for the taking. Capture Brilliant Photos and Videos with DIGIC DV Take advantage of Canons renowned image quality for both your videos and digital photos, thanks to the DIGIC DV system. DIGIC DV utilizes two different color techniques to maximize video quality for viewing on TVs and still image quality for print or computer display. The ZR100 also features 16bit Digital PCM audio, ensuring that every moment you capture sounds true to life. Canon is known the world over for its vast expertise in designing and crafting precision lenses for 35mm and broadcast TV cameras. That same expertise goes into every ZRseries digital camcorder, giving your videos and photos brilliant color and clarity. Spoil Family and Friends with Widescreen Images Impress even the most diehard movie aficionado with the ZR100s highresolution 169 widescreen recording mode.

Typically reserved for more expensive camcorder models, the 169 widescreen feature allows you to record true widescreen videos and photos for playback on home theatre systems. For enhanced accessibility, a Widescreen Button makes it easy to switch from the standard 43 mode to 169 Widescreen Mode. Youll also see exactly what you are shooting thanks to the 2.4inch LCD screens letterboxstyle display. The 169 widescreen feature is available in both Program Mode and Easy Recording Mode, and can be used in conjunction with the camcorders advanced image stabilization. As Comfortable to Hold as It Is Affordable The ZR100 brings together a streamlined design with easytouse controls, and wraps it all in an attractive high metal finish. With its seamless, fluid appearance, the ZR100 is smaller in depth and lighter by 2 ounces than previous ZR models thanks to the reduced gap between lens and viewfinder. Enhanced design features include New Program Selector Located beside the LCD display, the Program Selector makes it easy to quickly switch modes. Finger Rest Located on the upper side of the grip, the finger rest improves stability while shooting. Easy Operation Buttons PLAY and STOP buttons are now independent, while the FF and RW buttons are located together, improving usability by preventing accidental pressing of the wrong button. Oval Grip An ovalshaped grip located on the top of the lens improves shooting comfort while adding a touch of style. Flat Zoom Lever The brand new flat zoom lever not only makes for stressfree zooming, but also helps reduce the physical size of the camcorder. Slim Operation Switch For

increased miniaturization, the ZR camcorders feature an innovative Slim Operation Switch. Keep Sight of Your Subject when Outdoors Planning a trip to the tropics or even out to the local park. The ZR100 camcorder features an innovative backlight feature for improved visibility of the LCD display.

Simply press the LCD Backlight button to give the display a 250% boost in brightness. Shooting in bright light has never been easier on the eyes. Connect Seamlessly to Your TV, VCR, and Computer Your ZR100 digital camcorder opens up an entire world of move and stillimage making possibilities thanks to its MiniDV format a worldwide industry standard. But what about those older analog videotape memories. You can even convert the analog signal into a digital signal for direct transfer to digital video devices or computers equipped with an IEEE1394 terminal. The Analog to Digital Converter may not function depending on the software used. Its all thanks to Canons exclusive connection circuit, called VIC. VIC is a virtual powerhouse. Traditionally, multiple chips were needed to perform the camcorders input and output functions. However VIC manages it all with one single chip. The result is seamless connectivity whether you are connecting to a computer, TV, or VCR. Shoot Vibrant Video Even in Low Light Dinner parties, school plays. Specifically designed to capture those important lowlight memories, the ZR100s Night Mode automatically boosts the sensitivity of the CCD and lowers the shutter speed to help brighten the subject. The result is vibrant videos and photos that will last a lifetime. Transfer and Share Your Digital Memories The ZR100 features a DV terminal IEEE 1394 or Firewire for connection to a DVcompatible computer or another DVcamcorder. Transfer your digital movies to your computers hard disk without any loss in quality. Then, edit your scenes to create high impact Web sites, video email, interactive CDs and DVDs, or a personal video album. Let the creativity run wild thanks to true digital connectivity. Enjoy UltraSmooth Videos In addition to the ZR100s superior optics and image processing technology is its highquality image stabilization system.

The result of Canons superior electronic expertise, the image stabilizer is able to correct camcorder shake instantly, even when shooting handheld at full telephoto. The result is ultrasmooth videos that keep the focus on your subject. Print Your Digital Photos Without a Computer When youre ready to print your digital images, a single cable is all thats required to connect your ZR100 to a PictBridgecompliant printer. You can then control a variety of printing options from the camcorders menu. Choose from a range of different paper sizes with options for borderless or bordered prints. Exif Print 2.2 The ZR100 supports Exif Print 2.2, a worldwide standard that enhances communication between digital cameras and printers. At the time of shooting, vital camcorder settings and scene data are recorded with the image, resulting in realistic and reliable color reproduction. Poor lighting or mistakes can also be corrected, allowing photos to be even better than the originals. Shoot Complimentary Closeups For closeups that your family and friends will love, select the innovative Skin Detail Function to automatically soften details. The result is a more complimentary appearance and a more complimentary response from your subject!. Keep It Simple with PreProgrammed Settings Taking greatlooking digital photos has never been easier thanks to the ZR100s extensive variety of preprogrammed auto exposure modes. There is even an Auto Slow Shutter mode to give your videos a dreamlike quality. Each mode is carefully designed to give you the best possible image results under special shooting conditions. The advanced user will also appreciate being able to manually control focus, exposure levels, white balance, and the shutter speed. In addition, the ZR100 features autowind, date search and end search capabilities, and two recording speed modes LP and SP.

Use InCamera Effects for Extra RazzleDazzle Let your creative side out to play with the ZR100s wide selection of faders, including Fade Trigger, Wipe, Corner, Jump, Flip, Puzzle, Zigzag, Beam, and Tide. MultiImage Screen Divide your screen into four, nine or sixteen pictures with the Image Capture function. You can also select the speed the images are captured Manual, Slow, Moderate, or Fast. Give Your ZR100 the Personal Touch Put your mark on your ZR100 with customized startup

images and camcorder operation sounds. The My Camera Function also lets you choose between a variety of operating languages, be it English, French, Spanish, German, Italian, Russian, Chinese, or Japanese, in addition to the date format. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Luis BlancoUribe 5.0 out of 5 stars Thanks for the fast shipping All the tapes played, including the one that was left in the camcorder by the seller, skipped upon playing. I ended up borrowing a friend's camcorder and all of my tapes played just fine. Therefore, I have to conclude this particular camcorder was defective. The warning light is on all the time indicating the overall life of the battery is up. It is fairly old so it is to be expected. But it is unlikely the video or sound quality is much better than this one in some cases actually worse. A 720X480 video frame Mini DV standard resolution can only accommodate approx 340 K pixels therefore a mega or multi mega pixel camcorder will not improve your video performance one bit. And they cost least twice as much. I was looking for something really basic. I go for features and use them in a Camera not a Camcorder. When was the last time you used the fancy video functions. Do you even know where they reside on the menu.

This camcorder has all the functions you will use and some that you probably won't. It's sufficiently loaded in that regard. Performance I faced NO noise issues. In a very quiet room, there is faint noise when the auto gain circuit increases the mic sensitivity. However, under all my shooting conditions when the auto gain ramps down the mic sensitivity, this has not been a problem. The sound clarity is awesome the mic is quite high quality much better than my old Sony 8mm. Video WoW very impressed. Clear and colorful very close to what my eye sees. Very sharp as well. One can easily read text, see the veins on the leaves, the hair on the eyebrow on closeups. No problem regarding sharpness and overall color fidelity. Reds tended slightly towards pinkish sometimes minor. On a dark overcast day video came out looking just fantastic. Low Light performance On par with other camcorders out there. If you keep the lights in the room on reasonably well lit, you can capture excellent video great white balance with little to no noise. None of the blue tinge that I observed with another brand under the same conditions. In a dim room, the video is noisy, but still quite viewable. It is important to note that this camcorder has no worse performance than the others in its price range when it comes to low light performance. I have no problem with the location of the menu button as a matter of fact that is where I think it needs to be. Very easy to manual focus but haven't done so yet. Autofocus is snappy no hunting. I don't care how tapes are loaded from the top or bottom. How many of you shoot using a Tripod and need to change tapes halfway. The zoom speed depends on how far you press the zoom button simply great feature. Not just one or two steps. You can go from very slow to very fast zooms. The unit can work as an analog to digital converter something I plan to use to convert my 8mm tapes to digital.

The eyepiece viewfinder is color, does not flip, but very good otherwise. I use it a lot. The flip out display is apparently not the best out there, but I find it to be adequate if not downright good. You don't have to take the battery in and out for charging purposes. On the other hand, charging a spare battery ties up the camera unless you purchase an external charger. The supplied battery seems to last for an hour's worth of shooting works for me. One last thing I have not seen mentioned in other reviews and I don't know how other brands perform in this regard. The image stabilization was just too good. While shooting video going through Golden Gate Bridge in a carno zoom, the shots were almost professional in their stability. The exact same shots taken with an earlier camcorder without image stabilization are unwatchable. Note added later Compared to a PVGS150, the image stabilization on the Canon was definitely better. I'll cross compare other aspects with my friend's PVGS150 and report back. BTW I don't miss it not having photo taking abilities. All camcorder still pics are horrible when compared to my digicam. Why bother It does record hires 169 images instead of the cropped ones. Maybe that'll be good for the future. One purchase that exceeded my

expectations. Capturing Using a cheap firewire card and included cable together less than ten dollars, video capture using Ulead software and Win Xp was a breeze. Other software Pinnacle 9 worked equally well at capturing. Camera could be controlled from the software interface. The file size was approx 12 Gig DV compression for 45 min worth of shooting. Video looks very good on computer monitor and on TV. Now to MPEG 2 compress and author a DVD.If you already have a camcorder or are looking for something to make movies fit for Sundance submission with, this camcorder probably isnt for you. The Pros Its very easy to learn how to use READ THE MANUAL.

The battery lasts a long time about 2 hours of shooting time thats 2 DV tapesfull. Makes acceptable still frames, but not print quality, to share as ephotos with friends. See some pictures I uploaded as examples. Outdoor shooting resolution is acceptable. The Cons Indoors the pictures are pretty grainy, regardless of the special settings you use. You need a LOT of indoors light to get the graininess out of the film. Graininess is worse if you reuse your DV tapes.SPECIAL NOTE This camera is FABULOUS for translating your analog VHS tapes into digital format. The digital converter comes standard inside as part of the camera. I was able to take my wedding video on VHS, play it on my VCR, then through the camcorder and onto my Mac. I then used my Mac to make a DVD of our wedding a medium that lasts much longer than magnetic tapes like VHS. There was no generation loss of quality in this transfer. I have NO trouble with mine making extra noise.Its a decent MiniDV but you can do better at this price. Noise was a major issue. The motor is just loud and it gets picked up in quiet scenes pretty bad. Other than that the video recorded was of real good quality. But there was an issue with something going on when inserting a tape. It wasnt ejecting properly for some odd reason. The only reason why I got this was because it was recommended by an Apple rep.Panasonic has a fantastic MiniDV for almost the same price. Id pass on this one guys. Usado Muy buenoIncludes camera, battery, battery charger, and hand strap. 90 DAY WARRANTY Por favor, intentalo de nuevo mas tarde.Intentalo de nuevo.Elija una ubicacion de entrega diferente.Pagina 1 de 1 Volver al inicio Pagina 1 de 1 Para salir de este carrusel, utiliza la tecla de acceso directo del encabezado para desplazarte al encabezado siguiente o anterior.
