Verified This varies between manufacturers, but generally a needle will last about 8 hours. It might take longer for the needle to break, but before that it would become blunt and could damage the tissue. This was helpful (298) my needle keeps breaking, what is causing this? Verified there can be various reasons for this. The needle may not be the correct one for the selected fabric, the needle may have been set too low, the fabric may not be guided properly or the coil case may be positioned incorrectly. This was helpful (179) I checked everything, but my sewing machine thread keeps breaking, what can I do? Checked if the top wire of the machine keeps the break where the needle enters the fabric, it may be that the needle or coil case has less damage in the form of scratches and/or sharp edges. This minor damage can cause the wire to break after a few stitches. This was helpful (149) Do I need to turn my sewing machine completely to replace the needle? I think this is a good car for a beginner who is not ready to spend a lot of money. The manual should read first. In my opinion, the characteristic that helps most is Bobbin's drop for Bobbin's thread. Previously I had a car with a different area of Bobbin (randomly located) and I was always ruining the bobbin thread. This sewing machine is really easy from top wire even with clear numbering. Even the winding coil is simple. Putting in a new needle is not difficult. Beginners must be careful to turn only the hand wheel on the side in the correct direction. 3 \$ 4.99 This is a download manual. Please check your email after purchase.
