

I'm not robot!

Beyblade Burst, BEYBLADE BURST, Beyblade, Beyblader, Beyblade, Beyblade, Beyblade, Beyblade, BEYBLADE BURST, BEYBLADE BURST, Beyblade! Somebody who used to work for NVIDIA said some years ago that the future of video games were mobile phones. And he wasn't far off since the divisions of the greatest studios aimed at casual gamers have seen how their income has grown exponentially. The majority of consumers of these mobile games are essentially the youngest members of the household. For such purpose, nobody should be surprised that there are loads of video games for phones featuring childish or even cartoonish characters. BEYBLADE BURST is causing havoc all over the world! You might have missed the first episode of an anime series from the 90s called Beyblade but don't worry because we're here to tell you what it's about. This series, just like the Masters of the Universe in the 80s, was released to support the commercialization of futuristic looking spinning tops known as beyblades. In fact, the characters of that anime took part in spinning top battles to earn points to win the championship. How to play And this game we're talking about now, BEYBLADE BURST app, is basically the same. Just create a player profile to be given an initial set of tops to start playing (which you'll be able to improve by means of experience points or using the renowned pay-to-win method). You'll be offered a short tutorial and then it will be up to you to get down to the arena to battle it out against other gamers. You can get hold of new tops in two different manners: or winning different competitions or battles, or scanning QR codes attached to a real-life Beyblade. That's obviously to encourage you to purchase physical spinning tops at your nearest store. Take all the excitement and energy of Beyblade to your personal mobile device. Regarding the gameplay, each battle takes place in an arena where you'll control the Beyblade of your choice, whilst your rival will select his. Choose the trajectory to throw your top in order to decrease the life bar of your opponent's each time you hit it. You'll be able to make use of two special attacks depending on the Beyblade you're using. In any case, your victory or defeat seems to depend more on your luck than on a well-planned strategy. At the end of the day, this isn't Clash Royale or anything similar. That doesn't mean that it's not great fun as this app can definitely help you to kill your spare time whilst waiting for the bus or the tube. Home=Games=Action=BEYBLADE BURST app BEYBLADE BURST app is a dynamic action game presented in a form of duels with other players. The main goal of this epic game is to fight with other players around the world previously selecting the right spinning top and then customize the character in order to battle the enemy. If you are not familiar with manga with the same name, then you should know that the major game actions are playing out in the nearest future where people engage in some tournaments in order to win and get big money. The participants of the tournament are small robots that were previously developed, tested, and equipped with various weapons. Therefore, you will be one of the players who want to win and become a champion. Your aim is to defeat the enemies at the arena using superpowers of your robot. Moreover, you should be the coach for your machine to lead it to win. After downloading and installing the BEYBLADE BURST app, you will get a standard set of spinning tops to start your way to the championship. Nonetheless, you will be able to customize your spinning top using the well-known strategy called pay-to-win. Before starting the battle with the enemies at the battlefield, you will be prompted to explore a short tutorial. If you want to get some new machines, the player is enabled to do this in two different ways: first is to win various competitions or battles, and the second is about to scan QR-codes.As for the gameplay of the BEYBLADE BURST app, each battle takes place in the arena, where you will control the Beyblade. Choose your strategy by combining some different techniques to defeat them all.In addition, the game has some other features to note:quite nice gameplay with an easy-to-use control bar;lots of fighting modes where you can also train your skills before the real battle;a large set of robots to battle the enemies. Beyblade Burst App - an action that sends a player to a distant future, where competitions between combat tops are popular. Each of them is stuffed with a variety of weapons and is ready to cut the opponent clean. The player will control one of these tops and will compete with other robots. Excellent graphics will help you to feel the atmosphere of the futuristic world, and the dynamic gameplay will not let even the most demanding gamer get bored. In between duels, you can upgrade the robot, replacing its details and improving the firepower and appearance.
