RE: Ph.D. Program

This is to inform you that I am writing this letter to let you know about my keen interest in the Ph.D. program at {name of the university}. If you accept my letter, then it would be a dream come true for me.

I have completed my Bachelor's Degree in {name of the subject} and Masters in {name of the subject} in the year – YYYY and YYYY, respectively from {name of the University}.

I am a very diligent student and I would dedicate all my time and efforts to give my best while pursuing a Ph.D. at {name of the university}. In regard to my qualifications, I would be a good addition to the Ph.D. Program. I have attached all the necessary documents herewith.

Thanking you for reviewing my application.

Yours Truly,

University
Address

Dear Name of Contact/ To whom it may concern

My name is name, and I am a citizen of Ukraine currently enrolled (working) at university (institute) in city. I am sending you my completed application form for the undergraduate (graduate) degree program in field. I have (will have) taken the TOEFL on date of test and SAT (GRE, GMAT) on date of test. Official score reports for these tests will be sent to your university.

As you know, the currency in Ukraine is nonconvertible. Therefore, I am not in a position to pay for the required application fee. I would ask that your department and the office of undergraduate (graduate) admissions give full consideration to my application without this fee.

I have noted on the application form that I am applying for full financial support from the university to cover tuition and living expenses. Due to my financial situation, I am totally reliant on the generosity of the university to support my studies. I would ask you to consider me for any scholarships, (teaching assistantships, or research assistantships) or other awards for which I am eligible.

I would like to inform you that channels of communication between the USA and Ukraine are very poor, and highly unreliable. Therefore, I have enclosed all application materials in one envelope. I would ask that you please allow for extra time in transferring letters, documents, etc. At all times, I will try to stay in touch with you phone, fax or e-mail to monitor the progress of my application.

I have enclosed another copy of this letter, which I would ask you to pass along to the office of undergraduate (graduate) admissions so that they are alerted to the special circumstances surrounding my application.

Thank you very much for your attention to all these matters and for your consideration of my application.

I look forward to hearing from you soon.

Sincerely,

(Your Signature)
Your name

Letter of Motivation

Dear members of Selection Committee,

I have been fortunate to find information about Bourses du Gouvernement Français while I was looking for educational opportunities in the field of Optics & Photonics, multidisciplinary research approach and European high-level academic standards. Currently, I am completing the final year of my Bachelor program in Photonics and Optical Informatics (NRU ITMO, Saint-Petersburg), where in my academic curriculum and internship the main emphasis is made on generation, modulation and detection of light, its interactions with different kinds of matter. Being highly motivated and active in my study and practice, I came to a conclusion, that the crucial issue for me as a young researcher is to build educational and career trajectory in supportive academic environment that will fulfil my diligence. Therefore, I am happy to be accepted In two Master programs of Erasmus Mundus project where the main coordinators are French Universities (University of Rennes 1 and Univesite d'Aix-Marseille 3). Both these Master courses are perfectly coincides with my educational and scientific interests: photonic materials, optical communications and imaging systems.

I am confident that my educational and practical background constitutes a good foundation for Master program in the field of Photonics, Optics and Materials Science. My Bachelor studies include wide range of subjects, which have introduced intrinsic properties of light and optical properties of matter: Optical Physics, Fundamentals of Photonics, Electromagnetism and Matter, Optical Materials Science, Solid-State Physics, Chemistry, Quantum Mechanics, Mathematics, Numerical Methods and Information System Theory. I also gained valuable practical skills and obtained hands-on research experience while participating in internship projects, studying absorption and scattering behaviour of nanostructured materials such as dye-polymer composites, which are used for diffractive optical elements and are the subject of my Bachelor research. From this multidisciplinary experience I obtained necessary skills to plan, organise and conduct experiments, correctly analysing scientific data. I also developed an ability to represent results in intelligible form and successfully perform at conferences.

I feel comfortable processing several challenging things at one time. This ability helps me to be successful in study (my current GPA is 4.88 out of 5.00) and acquire extra-curricular knowledge. In order to better understand optical effects observed in my experimental thesis work, I decided to broaden my knowledge related to the studied problem. Hence I devoted my spare time for mastering new-to-me discipline: numerical methods for simulation of amplification and decay of holographic gratings in photopolymers. In order to grasp this knowledge I participated in another research group of my Department led by Professor Veniaminov who specialises on slow diffusion processes. Familiarising myself with his

Dear (Mr./Ms./) (Manager's Name),

My name is James Amore, and I'm excited to apply for the position of Junior IT specialist at the French Central Inc, Charleston. I'm a recent graduate (December YYYY) in Management Information Systems (MSI) from Charleston Southern University, and I'm eager to enter the workforce. I meet all of the academic requirements mentioned in your job posting.

Growing up, I took a liking to all things tech and digital, which led to me picking MSI as my major. Apart from all the tech courses during my MSi studies, I thoroughly enjoyed and excelled at the psychology courses, as the intersection of tech and humanity (specifically, how people respond to and adapt to technological changes) is a passion of mine. It's one that I discuss frequently on my tech blog (URL).

During my final year of university, I interned at Safe Homes Inc., a vendor providing an array of home security systems. I worked on both the hardware and software side, installing physical equipment as well as configuring the requisite software, and resolved elements of it.

What excites me most about this position is that the role involves extensive work with the Internet of Things (IoT). As a leader in combining IoT and hospitality, working at your firm would be a fantastic coming together of passion, competence, and opportunity.

I look forward to putting my knowledge and skills to use as a productive member of your IT department, and learning from the best in the industry. In an interview, I'd love to discuss my short- and long-term career goals and how they align with the French Central Inc's tech vision. I await your call.

Sincerely,

James P. Amore

Beth McLendon-Avryik, Pharm.D
Pharmacy Residency Program Director
Duke University Medical Center
Erwin Road, DUMC Box 3089
Durham, NC 27710

Dear Dr. McLendon-Avryik:

I am writing this letter to express my sincere interest in the Duke University Medical Center's American Society of Health-System Pharmacists (ASHP) accredited Postgraduate Year 1 (PGY1) residency program. I have had the pleasure to speak to current and past residents, and I have been very impressed with the opportunities that would be afforded me within your program.

Duke University Medical Center has everything that I am looking for in a PGY1 program. The appealing components consist of multidisciplinary interactions, presentation and research opportunities, a diverse patient population, and many networking opportunities. These components are important aspects to perfecting the practical experience and didactic components, as well as the leadership and research skills afforded via my on-the-job training at WakeMed Health and Hospitals and UNC's Doctorate of Pharmacy training. Additionally, the wide selection of elective rotations will provide me an excellent resource for mentoring in what I hope will be the next phase of my professional training, completion of a PGY2 program in transplant or infectious diseases.

Additionally, I strongly feel the program's training will facilitate both my short and long term career aspirations. I want a wide variety of experiences in order to enhance my skills, and the opportunity to interact with patients in order to become a proficient and well rounded clinical pharmacist. For this reason, the longitudinal experience in ambulatory care is very appealing. My short term goals are to obtain a pharmacy practice (PGY1) residency, followed by a PGY2 residency in one of my interest areas. My interests include infectious disease, transplant, and cardiology. During my residency experience, I hope to enhance my clinical expertise in addition to expanding my skills in research and administration. After completion of my residency training, I plan to seek a position were I can teach, conduct research, and maintain a clinical practice.

Thank you for considering my candidacy for the pharmacy practice (PGY1) residency at Duke University Medical Center. Please let me know if there is any additional information I can provide.

Sincerely,

Do your research: academic institutions often have a lot to say about their values, priority and vision. What is your yours The motto of the institution? Do they give priority to sports, arts or anything? Do they have a statement of values? How do you reflect these things? The most important question to think about in relation to these things - why do you want to go here? Connecting your knowledge of these things in your letter is a great way to ensure tutors admissions that your choice of studying in their institution is informed. Be specific: one of the biggest problems in the application is that candidates do not explain adequately because they want to study what they have requested. Remember, you have to explain your choice of subject and your choice of institution. Not just "why biology?" But "biology at this university" if you don't have any answers to this question yet, then it's worth going through the university website again, to figure out what inspired you to take the next step and request the chosen course. Write a story: people love stories. They like to be undertaken on a journey and brought to a satisfactory conclusion. A list of superlatives or successes is not convincing at all as an epic story that interweaves everything you have done in a coherent account, which supports the choice you have applied. Like all stories, make sure your motivational letter has a clear start, a means and an end. Everyone should logically follow each other, so that the reader is convinced of the suitability of the course and the chosen institution, for your skills, experience and objectives. Be interesting: this is undoubtedly the most important feature of a motivational letter - you must absolutely capture the interest of the reader. If you're being boring (or worse, bored) on paper, it's much less likely that you have a positive answer. But furthermore, the interest you express must be personal and must be directly related to on etnematulossa Å .vitom emoc isroc iraV .Jotteggosi id opmac len itteggos id ammag atsav anu ottodortni ah im .Joiratiseviniu emonj ,Jotteggosi ni oiratiseviniu mulucirruc ll .Joiratiseviniu emonj ad Jotteggosi ni cS.B ni aeral anu otugesnoc oH .jadneiza'lled emonj la Joroval id olotitf emoc otaroval oh etnemetnecer 'Åip e Jemonj omaihc im .arongis/erongis oraC)CSM(ezneicns ni retsam nu rep enoizavitom id arettel :l opmesE .otuges id ilanoizavitom erettel id illedom irtsom ia ataihcoc'nu iad ,adug anu erenetto icisereferp es am 7-Åsoc id erevircs elicaf "Åip eresse ebbertop asoc - atlice if ehc areirrac anu rep etnop nu Ariurtsoc e otanoissappa ies iuc us opmac nu
