The player's task is to enter the neighbor's house and resolve a series of puzzles to collect the objects needed to unlock and access his basement. While the player explores the neighbor's house, they must not be identified by the mysterious neighbor, or they will be chased, and if the player is not fast enough to hide or escape, he will be captured. The player can also stun the nearby launching objects to him for an easier escape. If the player is captured, they will be sent to your home and they will have to break again. When you start again, the player must be more careful, since the neighbor will deduce movements from the last attempt to set the traps. However, the player can use the game settings to turn on the model of the friendly neighbor, preventing the neighbor from setting these traps and causing him to be less aggressive in his goals. The game is played in a person prospect, and the player must aim at a lattice in certain objects to interact with them or launch or use a currently held object. Up to four objects can be stored in an inventory space. The articles of the same type cannot be stacked together in a slot. \* Requires a stable internet connection Next Secret Neighbor is a social multiplayer evergrowing horror game set in the universe Hello Neighbor.
