You have 5 days to escape from the haunted house if you do not want to get terrible results.Granny is considered one of the most scary horror puzzle games on mobile. You are locked in a scary dark house where the ghostly Granny is. Now, you have to find a way to escape from the house. But be very careful and do all actions very gently, do not make noise. She could hear every slight noise. If you drop something on the floor, the old lady will immediately hear and run after you.However, sometimes you can also take advantage of the noise to trap the old lady, escape the danger area. You can hide in the closet or under the bed to avoid being detected by her. Hurry up because you only have 5 days to escape from the house. Good luck!Granny Mod Apk - Gameplay ScreenshotGameplayThe house in the game Granny is like a maze with many floors and many different rooms. Because you do not know the structure of the house, you need to search for a way out, and explore scary areas such as bloody toilets and tubs, dark rooms, bloody pools on the floor. ... Be careful even with the dangerous pitfalls that the old lady deliberately placed in the middle of the aisle to trap you.When in an area, your task is to rummage through cabinets, drawers ... to find items such as pliers to cut wires, hammers to break doors, code cards, take advantage of the plank to bypass, the space to bridge ... Then find all you need to open the main door and exit. The main door was reinforced and locked with great certainty by various layers of locks. However, first, find yourself a safe hiding place to preserve life if the old lady suddenly enters the room.In addition to the items that help you unlock, the player also has an extremely powerful weapon that helps you a lot in the course of action, which is the bow and arrow of anesthetic. Try to find this bow, shoot at the ghost old woman for her coma within 2 minutes. In those 2 minutes, you can go anywhere, do everything without worrying about being discovered. Be quick to act before she wakes up. This bow and arrow can be used again and again, so every 2 minutes, you can continue to look for the old woman and shoot to ease action.Because it is designed in the first-person perspective, combining the images in the game is scary, dark, Granny game impresses the player. Surely, you will not be surprised many times by scary situations, unexpectedly combined with scary sounds, sometimes silent to the cold.Overall, Granny is an authentic horror game for those who want to try thrills. I love this game and it is so good that it turned out to be so ridiculously popular to the world! But there is one thing that has made the game boring. I hate to ask this but could you please add something new? Unless the final update was April then I'm sorry I asked. But other than that it is an amazing game and thank you for creating this!Tyler Stumpf: Well, this game is really great. The graphics could be improved, the sound is not bad, the style is very original, and the gameplay is astounding! But if I could ask for one feature updated to this game, is the option to have keyboard and mous controls. I have a Chromebook and tried to play this game and it was very hard with a mouse moving the joystick, and then trying to grab an item or hide at the same time. But I still give this a 5/5!Destiny Eastland: I love this game like, when I beat granny for the first time, I almost cried. I was funny because I dropped the car key in front of the car and then I hid. When granny came she walked in front of the car and I ran her over and boom I broke out! I reached one of my goals. If u havent, u should beat granny too!! Granny is a game for those who love horror elements that can entertain themselves. The player will play the role of a character confined in a room with an old woman with a mental illness. Do not understand what happened but after waking up you need to find a way to escape from this house. Of course, there is not much time for you, all are only 5 days. Will continuing your life like everyone else or facing death be the way you choose? Even if you surrender to a grim fate, that wicked old woman will not give you a decent death. Granny is the same old lady's name, be careful because you may die.Her only downside is being blind, but that is your advantage. However, her special ability is her very hearing ears. All your actions can be discovered and have a bad end. Granny lets the player participate in the escape to stay alive. Time is limited, take every opportunity you can do. But also need to be really calm enough because Granny is such a scary old lady. If you want softer gameplay, try the game Angry Birds Friends, Spiral Roll for entertainment or horror gameplay.Download Granny mod - Escape from the house to surviveGranny is actually a simple game with a game mode for those who love to chase. Of course, you are not actively pursuing. That psychotic granny won't forgive you if she finds out that someone is in the house. 5 days isn't too long for you to unlock the entire room and escape. The feeling of the thrill is probably the most obvious thing that players feel when experiencing this game. The player can learn more from the experience of being tortured by Granny. Although her eyes cannot be seen, her ears are very good in return. Also, you can't run while she's chased by her.Runaway or dieGranny is always updating to add new features to make it difficult for players. Any noise coming out of the room would make Granny's wrath rise up. No one is sure what she will do and will you survive those times? But the advice of GameDVA.com is that you need to be gentle in all cases, at least in this game. Granny gives players who find a meagre chance to live. If you don't get killed by Granny, you won't be able to survive after 5 days.What to do when discovered?If unfortunately discovered by Granny, how can the player be safe? I think many people will choose to run to escape. But the truth is that it only works to prolong your life a little longer. Even if you are a young man, the speed of running cannot be better than this psychotic old lady. Bedrooms, wardrobes will be a more reasonable place for those who want to continue living. Take a cover in it, because being blind, the chance of being found is always lower. But that doesn't mean you can be absolutely safe.Horror graphics, soundGameDVA rarely mentioned graphics and sound in games unless it had something outstanding. Granny is also one of those few exceptions, horror elements mostly come from visuals and sound effects. I'm not sure if you play a game at night, will you have the courage to go to the bathroom? Granny has done a great job in the entertaining gameplay giving the player a play style that is both actionable but brings a lot of different emotions. Fear, suspense, anxiety ... sounds a bit negative, but those are the things you have to face.Players will get stronger at least mentally after Granny's challenging levels. Think of a way to get out of this disgusting house so you can live like normal people. The dark scene embracing an old lady gives players a lot of memorable experiences. Download Granny mod to face the scary psychotic old lady and escape from this horror house. L'un des jeux d'aventure et d'horreur les plus réussis sur Android ces derniers temps est incontestablement Granny. Tout part d'une approche très simple : vous devez vous échapper d'une maison en essayant de ne pas être vu par votre ravisseur. La popularité du jeu est due au cadre que ses développeurs ont su créer ; depuis votre emprisonnement dans une très vieille maison dans laquelle le geôlier est une vieille femme pas du tout attachante ... plutôt même un vieil homme terrifiant qui, s'il découvre que vous quittez votre chambre, vous tue dès qu'il vous rattrape. Jouez à Granny en mode silencieux Granny MOD est une version modifiée de ce jeu d'aventure où vous déambulez dans la maison sans faire de bruit et vous cachez où vous pouvez. Il vous faut utiliser des cachettes, des clés et d'autres objets pour pouvoir dégager votre chemin (des portes fermées, principalement) tout en restant toujours très discret. C'est ici que ce MOD entre en action car il vous permet de ne pas être détecté, à moins que vous n'entrez dans le champ de vision du monstre.
