You can view videos posted by other users on the app or upload your videos ... more How To Change Your Age On TikTok Without Deleting Your Account TikTok is accessible to people that are above 13 years and you must be above 18 years to explore all the features on the ... more How To See Who Viewed Your TikTok Profile After TikTok updated its privacy policies and guidelines in 2020, it was no longer possible for users to see who viewed ... more January 4th, 2020 For any of you running MIUI 11 (which is the system running on most Xiaomi devices released in the past couple of years), you might have experienced an issue with the AnkiDroid Flashcards integration. The first time you select AnkiDroid Flashcards from Hanping's side navigation drawer, you will be presented with: Tapping on Grant Permission would normally take you forward to configure the AnkiDroid configuration, but on MIUI 11 it fails and you are taken back to Hanping's main screen instead. This is a bug with MIUI 11.0.3 (which hopefully Xiaomi will fix in the near future) and luckily there is a workaround: Enable Developer Options, by going to your device's Settings then My device / All specs and then tap on MIUI version about 10 times quickly. You will then see a message You are now a developer (if you don't, then you may have previously already enabled this option) Go to Settings / Additional Settings / Developer Options screen and scroll to the bottom to turn off MIUI optimization Back on the homescreen, long tap on Hanping Pro and then App Info / Permissions / Additional permissions and turn on Read and write to the AnkiDroid database Launch Hanping Pro / AnkiDroid Flashcards (side nav drawer) and then the Grant Permission should work! October 11th, 2019 Hanping Chinese Dictionary, I say Is 10 years old today! More updates on the way Wishing Happy Birthday! December 29th, 2018 Updated recognition engine Bug fixes Available from the Google Play Store. December 25th, 2018 Added support for pinyin/jyutping abbreviation search. Now you can type "wsm" or "wshm" instead of "weishenme" for faster lookups! One good strategy is to just enter the first character of each syllable (e.g. "zgr" for "zhongguoren") and, if there are too many matches, then finish the final syllable in full (e.g. "zgren" for "zhongguoren") Added some missing HSK2-5 multisyllable sounds (Hanping Pro only) Fixed bug in vocab importer (mostly concerning traditional Chinese) Fixed Ankidroid audio playback issue (when dictionary app not already running in background) Fixed backup/restore issue Updated CC-CEDICT dictionary data and Tutor Mandarin example sentences Other bug fixes Available from the Google Play Store. December 25th, 2018 Updated recognition engine Fixed Quick Settings Tile state Long-tap on copy button was not working Other bug fixes Available from the Google Play Store. October 5th, 2018 This is a minor update including: Updated dictionary, examples and stroke data Accessibility improvements Nice animation in search box Several bug fixes Available from the Google Play Store. June 4th, 2018 This update is for Android Marshmallow 6.0 and later. Improved handwriting/radicals UI Fixed some China-related bugs Updated dictionary data (CC-CEDICT/CANTODICT) (Hanping Cantonese app only) Fixed some issues with CANTODICT examples Other bug fixes Available from the Google Play Store. March 26th, 2018 This update is for Android Marshmallow 6.0 and later. Added Import User Vocab feature to allow bulk import of words into your custom tags. In the Tags tab, click on the 3-dots icon top-right (just below Tags label) and select Import user vocab file. You can then pick any text file and Hanping will automatically extract vocab from it. Note - the text file should contain a vocab list (e.g. one vocab item per line), not freeform text. Several different formats are supported (not just the Hanping format). Hanping first gives you a preview of ALL the words it finds before you proceed with the import. Imported words are auto-tagged like "_imported::2018-03-26 09:27" with the imported tag group displayed next to the starred and notes groups at the top of the Tags tab. New launcher icon (Android Oreo 8.0 and later) - the old-style Hanping icon does not fill well in the new Adaptive Icon style of Android Oreo, so it's received a total redesign! Added Zhonga to external links (great for example sentences) Wildcard search templates moved from Search screen overflow menu ("Custom search...") to search box context menu. To test this, enter 朋友 in search box and long-tap on search box (make sure the text is not selected). You will see menu items for *朋友, *朋友*, *朋*友* etc Pro & Lite only: Updated CC-CEDICT dictionary data and fixed some translation issues in the example sentences Several bug fixes Available from the Google Play Store. January 26th, 2018 More export options (long-tap on tag in Tags tab). Now you can also export your tagged (as well as built-in tags like HSK) words to a text file with all custom taggings & starrings included Performance improvements (e.g. regarding tag lists) (Mandarin apps only) Added another 100 example sentences (provided by TutorMandarin) Clip Monitor Quick Settings Tile tweaks Many bug fixes Available from the Google Play Store. App Info Download patched [6.7.1](36.12 MB) Exclusively on Android, so make your com.android.vending.CHECK_LICENSE App customer permission. com.android.vending.BILLING App customer permission. Access network state Allows to access information about networks. Internet Allows to access internet network. Wake lock Allows using PowerManager WakeLocks to keep processor from sleeping or screen from dimming. Read external storage Allows to read from external storage such as SD card. Write external storage Allows to write to external storage such as SD card. Receive boot completed Allows to receive the boot completed notification that is broadcast after the system finishes booting.
