Apk file size 1.2 mb file type application / vnd.android.package-archive fileapk extension downloads69526755 version2.0 click here to download easy FRP BYPASS APK FILE FRP BYPASS APK: Google Factory Reset Protection Easily all Android smartphones and tablets They are performing Android 5.0, come with this security patch. To bypass the Android FRP Lock, two guides are available. Just follow the simple steps for FRP bypass. Mainly with this guide, you will be able to bypass the Google FRP block easily, if you have lost your device or forget the account password. For the first method to bypass FRP, you need a USB unity, an OTG cable and a PC. Once you have these requirements, follow these steps: FRP first of all, you need to download the Bypass FRP APK from our official website. You can check the download link above. Once the file has been downloaded, copy the FRP bypass APK to the USB unit. Now start the Android device on which you are facing FRP problem. Subsequently, a configuration wizard will open where you need to follow the basic instructions. Once the bypass factory restoration protection screen appears. You will need to enter Google Account's login credentials. But due to the reason you missed the phone or not remember it, you need to try something else. Now using an OTG cable, you need to connect a USB stick to the Android device. Then you will see the opening of the Explorer file on your Android phone. Next, open the folder on the Android device where you saved the FRP Bypass APK file. During the installation process, the phone will block the installation and you might see an unknown source error. Just go to your device settings and enable the Unknown Sources option. Now it's again the install button to begin the installation process. After the installation is complete, tap open and will open the settings menu. In the settings, scroll down, select the backup and reset option. Then tap Reset factory data and touch the confirmation button. Enough! You have successfully bypass the Google factory restore protection to your Android device. Now you need to restart the device and you will have no bypass problem frp more. After rebooting your device, it is your choice to add a google account or skip. frp bypass apk android device requirements running lollipop or android version above. internet connection to download the required files. pc windows how to bypass the google factory restoration protection without otg the first method we shared above requires the otg cable along with bypass google factory reset file protection apk. but by this method, you do not need to use otg. why? Why?It will use the Bypass FRP tool, so make sure you have a working Internet connection. So it started: First, you need to turn on your Android device. You will see an installation wizard. Follow the on-screen instructions, once the Bypass FRP tool screen appears. You will need to open the keyboard and tap its settings. Next, you need to tap the MENU button and then the Help and Feedback button. Next, you need to type everything you want to write and choose the option æShare . Then choose the messaging option, then the new message and type any number in the æ " section. Then, choose it and tap the contact icon. Then tap the call button icon and tap the new call option. Once you open the dial, you need to type * # # # #4636 # * # * Now tap the Use Statistics option and tap the Back button. Then go to the settings menu. Then you need to tap the backup and reset option. Select factory data recovery and confirm it. This is it, boys!! You have successfully ignored Google account verification using the Bypass FRP tool. The screenshots of this guide are attached so that it will be easier for you to follow these steps. I hope these two methods have helped you clear your doubts about how to bypass the protection of Google factory restoration. Custom FRP Track Block Correction When a user roots the Samsung device, a custom binary block is automatically applied. This means by default Bypass FRP is activated. So it is also blocked your access to custom phone recovery. If you are facing this problem, you must follow the instructions provided below. Make sure you have Odin 3 downloaded and working on PC. Next, follow the following procedure: First, you need to download the tool from here. After this decompress and install it. Next, you will need to choose your Samsung device and hold the Home button, the power button and the volume button keys. Then you will get a notification of a system software update. In progress for the Software Updates option, you must hold the Volume Up button. Now open the Odin 3 tool and connect your Samsung device with your PC. Once the device is detected automatically, you must select the zip files from the file you downloaded above. Then tap the Start button and update the version of the device software started. Once the process finishes, you need to unplug the device and restart it. Keep in mind, let your system update the installation of the necessary things, so what is a few minutes. Using this method, you will be able to unlock the lock of Bypass factory repair protection. That's it! Now your custom Binary Binary Binary lock problem is completely fixed.
