Over the years, we've seen smartphones evolved so rapidly. We can now do a lot of things on our phones that we can also do on computers. Our smartphones essentially serve as a portable computer that we can carry everywhere we go. Because of this, this have opened a lot of opportunities for people. For people, recording their phones has become a necessity. Some smartphones are so advanced that they have an in-built screen recorder nowadays. However, if your phone doesn't have one, you can use AZ Screen Recorder! Downloaded and trusted by more than 50 million people worldwide, this app can do a lot more than just record your phone. In here, you can also record your screen with a face camera! There's also a GIF maker, draw on the screen while recording and so much more! The Ultimate Screen Recorder The existence of smartphones has brought about a lot of great things for all of us. Thanks to these devices, we can do a lot of things such as communicate with our loved ones, play games and more! We no longer have to rely solely on a computer to do a lot of things now. Aside from that, some people are looking to record their smartphone screens to make various videos such as tutorials, gameplays, lives, YouTube videos, TikToks and more! Whatever you need, AZ Screen Recorder is the app for you! This screen recorder app can record everything in high-quality including the sound. Aside from that, you can access extra features such as the GIF maker, face camera and more! AZ Screen Recorder is an awesome screen recorder app that does a lot more than just record your screen. Here are its awesome features: High-quality recorder - The main feature of AZ Screen Recorder is to record your smartphone's screen to create videos. Whatever you wish to create, you can do so. Here are some of the types of videos you can make here: live streams, tutorials, gameplays, YouTube videos, TikToks videos and more! Whatever you're going to create, you can easily customize the app for your use. But the app doesn't just offer it in that, it allows you to record in the highest quality possible! You can record for up to 1080p, 12Mbps and 60FPS. Of course, the higher the quality, the bigger the file size. No recording limit - With AZ Screen Recorder, you don't have to worry about time limits anymore! So long as you have the storage capacity, you can record a lot of videos on your phone using this app. This doesn't limit the number of videos you can create. In fact, you can create as much as you need. Screen recorder with Facecam - Sometimes, we may need to create videos where we should show our faces. These can be videos such as livestreams, video calls, live shows and more. With AZ Screen Recorder, you can easily do this thanks to their Facecam feature! Now your face can be recorded in a small overlay window. You can adjust the size and drag it to any position you want for maximum convenience! GIF maker - You can record and make your own GIFs in this app! Just access the GIF recorder and you can make a short video clip that loops. This video clip doesn't have a sound and it's perfect for memes and tutorials! Smart controls - The app also allows you to access its features easily using smart controls. You can pause/resume recording, and you can shake the device to easily stop recording! Draw on the screen - You can also draw on the screen so you can get your point across easily! No need for external apps or physical boards. article AZ Screen Recorder is an application that allows users to record screen videos in the best way. For phone users, recording actions on the device's screen will always be a regular action. But with the original videos built into the phone often do not give users the best experience. Then give the app a try to improve your experience. Exactly, this is a professional screen recorder with a lot of great supporting features. With this application, you will be able to completely change the quality of the recorded footage on the screen compared to the video recorders you are used to. With the name of the application given by the manufacturers, users will also be able to understand the primary use that the application will bring fully. The first thing that needs to be mentioned with the video recorder definitely needs to be mentioned will be the video quality that the application can record. For those who need to record videos in the most detail, the detailed parameters you can record, such as 1080p, 60FPS, 12Mbps, will definitely satisfy you. Besides, the image on the screen will be recorded, but you will also be recorded the sound that is running in parallel directly emitted along with the video recording. If even your need is exceptionally professional screen recordings, then AZ Screen Recorder will also be able to best support you. After you have done the various filming operations that have been prepared in advance, the videos will be able to be edited right inside the application. When accessing the application, you will be able to perform professional video editing operations already integrated. With the screen video editor integrated into the application, you will be able to perform highly professional operations like a typical video editing application. Basic operations such as cutting, rotating, and deleting the middle of the video will be done quickly through elementary operations. In addition, you will also be able to perform operations such as inserting music, inserting effects, adding subtitles, or compressing videos for easy storage. With this application, you will not only be able to use the main tasks that the application is intended for, but the additional features will also bring a great experience. First of all, it is necessary to mention the ability to capture the phone screen and edit those images. You will only need to do a few simple steps to be able to save your phone screen with an image and make edits later with the application. Even for users who want to use complex operations, the application will be able to support live streaming. With this built-in feature, users will be able to completely live stream their phone screen on major online platforms such as Youtube, Facebook, or Twitch. Along with that, try combining the streaming feature with the front camera to optimize your actions! The original screen video recorders of mobile devices will often not give users the best experience. Then try to come to AZ Screen Recorder to get the best services. Along with other features such as video editing, live streaming, or screen capture, ... the application will be able to bring users satisfaction when using.
