You can find a list of supported browsers in our help center. Help Center />Tom10/16/202009/03/2022Share on TwitterShare on Facebook Hello Clashers! As always with every Clash update, let's take a closer look at the hidden and minor changes that have been made to the game. Supercell released extensive patch notes this time around, so there were plenty of surprises. Some of the items on this list were barely announced in Sneak Peeks, while some weren't even announced in the patch notes. Look at that! ContentChampion King This biggest surprise in the update is the beautiful Champion King skin. This skin can be purchased for $10 and is themed Clash World Cup 2020. This is a one-time offer, get it while you can! Champion Skin As always on Twitter we are giving away 2 skins to our followers. !Improved skins The Champion Barbarian is the first skin with new and improved graphics. From the patch notes: "The new technology added to the skin's functionality allows for cooler and wilder special effects such as custom created units, attacks, smoke effects, etc." As we can see, the champion has a cool flame sword and special effects with smoke and flames when he attacks. This is the first skin that changes the barbarians that appear when Iron Fist is activated. Jeweled Skeleton King One of the best skins on the market, Skeleton King is now available for purchase with jewels. Challenges for the Halloween season 2019, now is your chance to get them gems. Soft Launch Supercell ID Many Supercell ID changes have been announced: You can now name each of your Supercell ID accounts. Ability to add profiles and profile pictures - time to find the best kitten photo! Friends List - You can add nowto your Supercell ID account and play all Supercell games with it. Now you can see who's online on your friends list and what Supercell game they're currently playing! However, the update did not make them available globally. The Clash team is slowly introducing them to all countries. So if you still don't have these features, wait. You will receive it in the next few days. Defense Switch Removed This huge QoL improvement brought something to the game that most players didn't know about: characters will now always guard the village and automatically heal when defending. It is absolutely wonderful. Every time you open the game, your characters are now ready for battle. Halloween Squad: Skeleton Barrel It has been widely announced that we will once again have a temporary Halloween squad this year. This time it's Skeleton Barrel! While not as good as King's Spirit, which was incredibly strong last year, Skeleton Barrel is back in the game for a second time. It first appeared during Halloween 2019. The 7 day hiatus announced in the preview has been removed for Super Soldiers. It's too big to miss: Supercell has removed the 7-day hiatus after using Super Soldiers. It's huge! Now you can buy the same Super Squad multiple times without waiting while you can! Is there something missing here? Found another cool hidden change? Let me know on Twitter and I'll update this post. Greetings and Happy Halloween! About the Author Creator and Editor-in-Chief of House of Clashers. Brazilian developer who has been playing and writing about Clash of Clans since 2012. Here you will find the village where the members of your fearless clan live. You can then send them out into the world to complete missions and show their skills by destroying enemy camps. Split into two completely different phases, you start by building buildings and hiring citizens (yes, you have to pay them). Later, you will have the opportunity to participate in real-time strategic battles where you can show off your skills. With ten different types of units, you can build your strategy as you gain experience and money. Defense systems should also be designed for your city and are necessary if you want to counter violence.enemy attacks. Considering its viral success, Clash of Clans is certainly a very interesting classic management strategy game that is much more unique than you might think at first glance. What's more, it's completely free and fully optimized for Android. Feedback from Andres Lepes Translated by the Uptodown localization team To play Clash of Clans on PC, you can download the version of Gameloop available on Uptodown. In this version, you will find an installer that will open the game directly for you. Clash of Clans generates significant revenue, with around $7 billion in current revenue since launch and throughout the history of the video game. Currently, 567 million people have downloaded Clash of Clans on their Android devices at some point in their lives. Clash of Clans currently has nearly 130 million monthly players. In Clash of Clans P.E.K.K.A. this is a unit that can be unlocked in the standard barracks when the user reaches level 10. You also need a town hall at level 8. This is a heavy melee unit. Clash of Clans is about 270MB. Since this is a large APK file, you will need to check the location on your Android device. After installing the game, it is very likely that you will have patches downloaded. Yes, Clash of Clans is free to play. To download the app, you can find the APK file on Uptodown where you can download the video game for free. Clash of Clans includes in-app purchases to unlock items or characters. To download Clash of Clans, just find the APK file on Uptodown. Here you can find the latest updated version so you can install the app without any problems. 15.0.3 2022-10-22 15.0.2 2022-10-15 15.0.1 2022-10-10 14.635.9 2022-08-10 14.635.8 2022-08-28 14.06728 14.06728 image in your village. To make room for buildings, the player must either remove obstacles with the builder or move them to another location with the obstacle shovel. Each removed obstacle can contain any location0 to 6 gems. The amount of gems you get for overcoming obstacles in your home village and builder base is determined in three cycles. All three cycles are identical, run simultaneously and are independent of each other, that is, overcoming an obstacle only moves one of the cycles lower and does not affect the position of the other two cycles. The created obstacle cycle repeats as follows: 6, 0, 4, 5, 1, 3, 2, 0, 0, 5, 1, 0, 3, 4, 0, 0, 5, 0, 1, 0. According to Darian they don't have 4, 5, or 6 gem rewards. The loop looks like this: 3,0,1,2,0,1,1,0,0,3,1,0,2,2,0,0,3,0,1,0 for initial obstacles. The first cycle determines the amount of gems you get from an obstacle in your home village. Advances when you clear an obstacle in your home village. The second cycle determines the amount of gems you get for the initial builder base obstacles (ie the obstacles that appear when you first enter the builder base). It moves when you remove an obstacle in the Builder Base. The third cycle determines the number of gems you get from the obstacles created by the builder base (ie obstacles that appear some time after you enter the builder base). It moves when you remove such an obstacle in the Builder Base. According to Darian, three of the original Constructor Base obstacles are believed to have been created. The three Builder Base obstacles that are believed to have been created are stone obstacles and were posted by Darian. On average, you get 2 gems for each obstacle you overcome. This template does not include the 25 gems stored in the gem box or holiday themed obstacles such as the various Halloween obstacles (2014-2016) which have a potion; instead Clashmas Trees (2012–2016) is gold. The maximum number of gems that can be obtained from a medium obstacle is 6. Vegetation regenerates at the rate of 1 item every eight hours unless all slots in the village are full. Also, the obstacle only appears if there is a buffer zone of 1 cell.where another building or obstacle appears. Stones do not regenerate once removed. You cannot build buildings on obstacles (unless it is tall grass). Since vegetation regenerates and removes gems, regularly removing vegetation can be an unlimited (though sometimes slow) source of gems. If you accidentally set the builder to remove an obstacle, you can cancel it by pressing the button before the builder finishes. If you cancel the removal of an obstacle, you will be refunded 100% of the resources spent, compared to a 50% refund for all other upgrades. Your village can have a maximum of 45 obstacles at a time - when this limit is reached or exceeded, normal obstacles will no longer spawn until you remove the obstacles. Gem chests and holiday obstacles ignore this respawn limit and can respawn even if there are more than 45 obstacles in the village. There is an achievement called "Nice and Tidy" that gives players experience and gems for clearing 10/50/500 obstacles. Units can spawn next to and/or on top of obstacles that are not 3x3. After the Halloween 2014 update, the time it takes to clear all obstacles except mushrooms has been reduced. When an obstacle appears in the game, the spawn weight represents the probability that the item will appear. Type Size Mining Time Gain Experience Mining Cost Weight Mushroom 2x2 10s 3 100 10% Bushes 2x2 10s 3 250 20% Trunk (1) 1x2 10s 3 1000 10% Trunk (2) 2x2 10s 3 1000 (trunk raised) 2x2 10s 3 1000 20% Tree (Small) 2x2 10s 3 2000 20% Tree (Medium) 3x3 15s 3 7500 5% Tree (Large) 3x3 15s 3 10000 Gesture 2x Stones once 03 03 03 once 0000 removed will not recover. Type Size Removal Time Experience Experience Profit Cost to Remove Stone (Small 1) 1x2 10s 3500 Stone (Small 2) 2x2 10s 3500 Stone (Small 3) 2x2 10s 3500 Stone (Small 4) 2x2 10s 3500 Stones 3500 Stones 10,000 Stones (Large) 3x3 15s 3 20,000 Tombstones spawn whenever a party spawnsElixir units and ice golems create tombstones, and dark elixir units create dark tombstones. Tombstones will not spawn when soldiers die on a building or trap, even if they are destroyed or unarmed, because there would be no space in the defending player's base because something is taking up space. Tombstones can appear in both the Home Village and the Builder Base. A simple tombstone is sometimes seen on loot wagons. When you first enter the Builder's Base, there are several tombstones in the base that can be removed after completing the tutorial. Each gives 20 builder potions and there is no need to remove the 3rd hall of builders or master builder. Tombstones created during Versus battles disappear after the battle ends. Type Size Delete Time Delete Occurrence Occurrence Tombstone 1x1 Instant 20 Attack or defend a potion or squad of ice golems. Dark Tombstone 1x1 Instant 1 Attack or Defense Dark Elixir units are killed. Gem Box is a mysterious box containing 25 gems. When the Gem Chest was added, it was quickly removed due to some bugs related to the amount of gems given. The Gem Chest was added to the game on April 9, 2014 as an update that added Clan Wars. You can only have 1 gem chest at a time. Clearing a gem chest costs 1000 Elixir. It takes 30 seconds to clear one, and clearing one will give you 25 gems. Gem Box is rare but increased in April 2014 update. You must have a Level 3 Engineer Hall to overcome the obstacles in the Engineer Base. Obstacles in the construction base spawn similarly to obstacles in your home village. While trees (and their variants), groves, and grass will respawn over time, mushrooms, rocks, and stones will no longer respawn when the obstacle limit is not reached. There are many obstacles in both the home village and the construction base. Tall grass is the only major Builder Base obstacle that doesn't require a free Master Builder to clear and never gives gems. you canRemove it for 50 or free by placing a building on top of it and the obstacle is instant. The last method can be done without level 3 Hall of Builders. Clearing tall grass for 50 counts towards the "Nice and Neat Achievement" and "Gardening Practice" clan quests, but placing a free building does not. In village edit mode, tall grass can be removed with Elixir, but not by placing buildings on it. An old barbarian statue next to it spawns tall grass. The same applies to the destruction of ancient barbarian statues. If none of these are present, the remaining tall grass can still spawn next to the nearby tall grass, but even if all the tall grass is cut down, the tall grass will not regenerate until you buy the Ancient Barbarian statue. Type Size Harvest Cost Harvest Time Experience Gain Weight Respawn Tall Grass (1) 1x1 50 * Instant N/A 3%** Tall Grass (2) 1x1 50 * Instant N/A 3%** Mushroom 2x2 100 10s 3 10% Tree Stump 2x2 500 10s 3 20% Trunk 2x2 1000 10s 3 20% Small Tree (2x2) 2x2 2000 10s 3 20% Tree 2x2 2000 10s 3 30% Large Tree 0m away 20s 30 All Experience Gain 10% 10% Stone) 2x2 5030 10s Small 2) 2x2 5) 10s 3 stone (small 3) 2x2 500 10s 3 stone (small 4) 2x2 500 10s 3 stone (Smax 1lls 500 10s 2x 3) stone 300 20 000 15s 3 Old statue of Barbara 3x3 200 000 1m 7 *Can be removed for free by placing a building on top of it; See above for details. ** Tall Grass only regenerates when at least one of the following is present: another Tall Grass nearby, an Ancient Barbarian Statue Obstacle, or an Ancient Barbarian Statue Decoration. Special Obstacles These obstacles only appear for a limited time and are usually created to commemorate a holiday. After the spawn period ends, players can still save these obstacles (and the gem box) ignore the one stone buffer zonethis regulates where normal vegetation can grow. They can spawn in any empty 2x2 square in your village, although they usually spawn near the outer edges of the square. Clashmas Trees is an exceptional special obstacle, with different versions appearing every winter since the game's release. The first Clashmas tree was added in 2012 and appears as a small tree with flashing colorful decorations. It initially gave 30,000 gold when cleared, which was then increased to 50,000. On January 3, 2013, Supercell stated on the forums that people can keep their trees even after the winter theme disappears. The tree also appears in the Gold Rush level of the single player campaign. The Clashmas 2013 tree looks like a small tree with gold garlands, a golden spiky ball at the top and two skulls at the bottom of the tree. The tree also appears in the Gobbowton level in the single player campaign. This Clashmas tree yields 75,000 gold when cleared and this number has been maintained for all subsequent Clashmas trees. The 2014 Christmas tree looks similar to the 2012 Christmas tree, but is decorated with tinsel, candies, as well as colorful ornaments and twinkling lights. In Winter 2014, the tree gave out randomly wrapped gifts worth 5,000 Elixir when it was cleansed. The tree also appears in the Fool's Gold level of the single player campaign. The Christmas Tree 2015 looks like a black metal tree with gold chains, spikes and a spiky ball on top. There is also a sword nearby. Sparks can be seen when zoomed in. The 2016 Christmas tree is tied with red and orange ribbons and has a white top. The 2017 Christmas tree is almost all white, with a blue and white gem on top. The 2018 Christmas tree has blue decorations with a conductive rod at the top and an electric coil at the bottom right. The 2019 Christmas tree is blue with gold stars around the tree and a snowflake on top. The 2020 Christmas tree is green and yellow, orange and red ribbons are woven around itit features cyan and yellow lights and gold jewels, surmounted by a gold star. Since 2014, there are special Halloween obstacles every Halloween. Halloween Tombstone was launched in 2014. It looks like a normal tombstone, but with an octagonal engraving on the tombstone and a skeleton hand sticking out of the ground. The obstacle appears to have inspired the design of the Tombstone map in Clash Royale. The Halloween cauldron, which was created in 2015, looks like a cauldron with a potion-colored liquid inside. The obstacle may have inspired the design of the furnace map in Clash Royale. Born in 2016, the creepy pumpkin looks like a pumpkin split in half with a zig-zag cut resembling sharp teeth and a pink interior. The pumpkin opens and closes its "mouth" from time to time. The somewhat simply named Halloween obstacle appeared in 2017 and looks like the skull of a baby dragon. The witch hat appeared in 2018 and appears as a purple hat, reminiscent of the hats associated with witches in popular culture. In Halloween 2019, another obstacle called "Halloween Obstacle" was created. It was later renamed "Scary Tree". It looks like a dark crooked tree with a crow perched on it. The Empty Tomb may appear during Halloween 2020. It resembles an open coffin with an open lid, a lantern, and a shovel next to it. When touched, a transparent skeleton flies out of the coffin and disappears. In the single player campaign, the Goblin Gauntlet mission has a special military camp type which is just a campfire with a different environment than the military camp which is only 2x2. You can tell by the other obstacles next to the fire. You can also drop troops on it as it is considered an obstacle. Clashmas Tree Chopping (2012) Film & Award: Video Since 2018, several Chinese New Year obstacles have been introduced: both hiding fireworks andThe tree was added during the 2018 CNY period. A glowing lantern has been added for the 2019 RMB season. It should be noted that this is the first special obstacle in the Builder Base. 7th Birthday Surprise Launch A special obstacle celebrating the anniversary of Clash of Clans' global launch appears every August starting in 2017. During the 6th anniversary period (August 2018). The 7th birthday surprise was added during the 7 year anniversary period. Removing it costs 7777 Elixir and gives 77777 Elixir in return. At first it looks like a gift, but when you squeeze it, it reveals a party balloon inside. The 8th birthday cake was released on the 8th anniversary and it costs 8888 gold to remove and you can get 88888 gold. It is a gold frosted cake with a symbolic gem that resembles the number 8. The 9th birthday cake was released to celebrate the 9th anniversary and it costs 9999 gold to remove and you get 99999 gold in return. It's a two-tiered cake with pink frosting and a sword stuck in the middle. Spike-y Cactus was released to celebrate the release of the highly anticipated Supercell game Brawl Stars. It reminds me of Brawler Spike. 10th Anniversary Cake Tap The 10th Anniversary Cake makes a unique sound when tapped and the barbarian stands out from the top tier. Type Size Removal Cost Removal Time Experience Profit Removal Reward Revive Weight Clashmas Tree (2012) 2x2 25,000 30s 5,50,000 2% Clashmas Tree (2013~2017, 2019, 2021) 1 MB 5x20,0,0,0,0 ,0,0 2x20,0,0. %None 25 5 75,000 2% Halloween Cauldron (2015) 2x2 25,000 30s 5,75,000 2% Haunted Pumpkin (2016) 2x2 25,000 30s 5,75,000 N2 5,75,000 N2 5,75,000 2010-2011-2011) 2x2 500 5s 2 75,000 N/A Spikes Cactus 2x2 1,000 30s 5 n/a N/A 7th Birthday Surprise (2019) 7 70 772 7 N/A Glow Lantern (202.0 CNY) 77777 30s 5 77777 N/A 8th Anniversary Cake (2020) 2x2 8888 30th Tomby 8 2020 200 20 8 A 5 75000 N/A Cake (2021) 2 x 2 9999 30s 5 999 999 N/A "Friendly" Flower (Halloween 2021) 2 x 2 500 30 s N/A 5 75 000 N/A Clashmas Tree (2021) Trick or Treat? (Halloween 2022) 2 x 2 25,000 30s 5 75,000 n/a Trivia The rainbow effect on the jewel box is the basis for the saying "at the end of the rainbow is a pot of gold". However, in this case, the pot of gold is a pot of gems. A box of gems could crush a piece of mushroom when it fell from the sky. Mushrooms below: Gems are not purchased, earned through achievements, or spent on various

objectives, it takes 1,623 obstacles (not including gem chests) to purchase builder's huts 3, 4, and 5, which cost a total of 3,500 gems, or about 528 days. (counting from the first obstacle removed and assuming that the village always has less than 45 obstacles so that new obstacles can occur). In very early versions of the game, a strange looking stone could appear in a newly created village. It became unattainable shortly after the game's release, and some players still have it. Some examples of players who still have this stone: (#Y98CJG, #PULPLU, #LLJUOO, #C2VY8G, #UPYJ, #8J88U, #V9CC8). This stone reappeared in the October 23, 2018 update for the new single-player campaign maps High Pressure and Burning.He also appears in the first Build Base battle against Master Jimmy. You can also see him in the Super Troop Playground if you have Town Hall 11 or higher. Aside from the gem box, the prickly cactus and glowing lantern are the only obstacles that provide a resource other than the one used to clear it. The Glowing Lantern is currently the only special obstacle that appears in the Builder Base. As a 2015 April Fool's Day prank, Supercell stated that gem boxes would be affected by lightning magic just like other pranks. On December 13, 2019, Clash of Clans Community Manager Darian made this post on Reddit with the graph shown on the right showing the number of players who had a Clashmas tree for each year. The Jewel Box was temporarily removed from the game during maintenance on January 29, 2014, but reappeared in the April 2014 update after a bug was fixed. Icon Description Click this icon to remove this golden obstacle if you have enough gold and a free builder. This icon only appears when an obstacle is in the home village and requires gold to remove. When you click this icon, this obstacle will be removed with an elixir if you have enough elixir and a free Builder. This icon only appears when there is an obstacle in the home village and a potion is needed to remove it. Click on this icon to remove this obstacle in exchange for gold if you have enough gold and a free Master Builder or O.T.T.O. This icon only appears when there is an obstacle in the builder's base and gold is needed to remove it. Click this icon to remove this potion obstacle if you have enough potion and a free Master Builder or O.T.T.O. This icon only appears when there is an obstacle in the builder's base and a potion is needed to remove it. Pressing this icon, displayed while removing the selected obstacle, will cancel the removal of that obstacle and refund the full price. Press this icon to move this obstacle to another slot for one obstacle shovel. This icon will only appear if you have at least onefrom obstacles. Obstacle.
